

Elevate Your Modern Work Portfolio.

StageTools integrates easily with Microsoft Teams.

This guide walks through the steps for IT Admin to deploy the app for users in your organization.

StageTools enhances Teams with:

- **Missing Business Tools** like Decisions or Ressources direct on stage
- **All Tools are built into Teams**, no more App switching
- **Interactive Collaboration** with everyone

Deployment guidance for IT admins

Prerequisites

- Active Microsoft 365 subscription
- Active StageTools License
 1. Sign into the Microsoft Teams admin center
 2. Allow Access to third-party apps
 3. Select manage apps, and search for StageTools
 4. Click allow

Deployment guidance for Teams

1. Goto Teams store
2. Search for StageTools
3. Click „add“
